

Dear Honorable M.P.

Gas Explosion !! Gladstone next ?

Did you see on Nine MSN website www.thespec.com/news/article/416077
a Gas explosion in Toronto ?

The video is must see for all MP's considering the dangers proposed for the Gladstone community.

The tanker (truck) involved in the Toronto explosion was reportedly carrying 220 cubic metres of gas when it exploded.

Imagine the mess a Gas tanker (ship) would cause should it explode in Gladstone Harbour with 125,000 cubic metres of gas.

That is 568 times more potent than the catastrophe that you will see in the Toronto video.

It's hard to imagine why the Bligh Government is considering exposing Gladstone to this risk.

Save Curtis Island and the Gladstone Community before it's too late.

Yours sincerely

Geoff Bonney
