The Hon Kevin Rudd MP
Prime Minister
Parliament House
CANBERRA ACT 2600

Dear Prime Minister

Are you concerned about Global Warming and our Environment?

If you are serious about the environment, I ask you to wholeheartedly consider what the Bligh Government proposes for Curtis Island in Queensland.

Experts will attest to **Curtis Island** being **unique in character & ecologically significant**. Environmental expert Professor Thomas Faunce BA LLB (Hons) BMed PhD says **“Curtis Island is the Lungs of Gladstone”**

The Bligh Government proposes to rip the lungs out of Gladstone by extending the State Development Area over a portion of Curtis Island, located adjacent to a National Park, Marine Park, State Forest, Conservation Reserves & Habitat Protection Zone.

Curtis Island has 6 endangered, 1 critically endangered and 34 vulnerable species that will be directly affected by the Bligh Government's proposed act of Environmental Vandalism.

I trust that you will be instrumental in persuading your State Colleague to make the right decision and **DECLARE CURTIS ISLAND A NATIONAL PARK**.

In the event that you are unsuccessful in this regard, I request that you take the same action a previous Federal Government took on Fraser Island and **SAVE THIS NATURAL WONDERLAND** for future generations.

I invite you to visit our website www.savecurtisland.com and in particular view the photos that demonstrate what the Bligh Government is proposing to destroy.

I have enclosed a copy of my communication to each Queensland State Minister in relation to Saving Curtis Island.

Yours sincerely

Geoff Bonney
